

Spectrum Quartz Product Care Guide

Important Information

- Spectrum Quartz is very durable. However, no stone is chip or damage proof.
- Proper care and simple cleaning can help your surface last for many years to come.

Cleaning Your Surface

- Using a damp, non-abrasive cloth or soft sponge, wipe the surface to remove any debris or materials on the surface.
- You may use a mild soap or detergent. Be sure not to use any abrasive cleaning products.
- For difficult spots, soak the area first using a wet cloth or paper towels and warm water for 10 minutes.
- If an object is stuck, use a plastic putty knife to gently scrape the object off the surface.
- Dry the surface completely after cleaning.

Caring for Your Surface

- Always use a cutting board when cutting and do not use knives directly on the surface.
- Do not expose Spectrum Quartz to harsh chemicals such as acetone, bleach, concentrated acids, oven or drain cleaners, or highly alkaline chemicals.
- Natural stone can be damaged by sudden and extreme temperature changes. Do not place hot pots, pans, stoneware, or other objects onto the surface directly. Use a trivet or hot pad.
- Do not use abrasive cleaning products as these may damage the surface.
